TECHNICAL SKILLS

Operating Systems: Windows, Linux, macOS, iOS, Android, IBM Z/OS

Computer Software/Frameworks: Azure, InTune, DigitalOcean, Git, Docker, APIs, DevOps, AI/ML

Programming/Networking: Python, C++, Batch, COBOL, SSH, Latex, Lex/Flex, SQL

COURSEWORK & PROJECTS

AI-Powered Phishing Email Detector (Python | AI/ML | Gemini API): Built a phishing detection tool that leverages Gemini to analyze emails, identify suspicious patterns, and provide explainable security insights.

Personal Media Server (DevOps | Linux | Docker): Deployed and maintained a self-hosted streaming platform using Jellyfin, including server administration, Docker containerization, and network configuration.

Perceptron Machine Learning Model (Python | AI/ML | Data Science): Optimized a perceptron machine learning model using a cancer dataset to recognize different types of cancer.

Wordle Game Recreation (Python | Full-Stack | Game Development): Developed a recreation and variant of the popular online word game "Wordle" with references to Ohio University with a group.

EDUCATION

Ohio University, College of Russ Engineering | Athens, Ohio

May 2026

Bachelor of Science, Computer Science

EXPERIENCE

Ohio University Office of Information Technology | Athens, Ohio

March 2024 – Present

IT Service Desk Student Technician II

- Promoted to a leadership role for technical expertise, customer service, managing software installations, device maintenance, and troubleshooting for university equipment.
- Integrated Call Center Tech Desk duties post-merger (Jan 2025), gaining hands-on experience with Azure, Cisco Systems, and Identity Management (IDM) for account security and network operations.
- Conduct performance evaluations, liaison between student staff and full-time IT personnel, report outages, and oversee laptop imaging and deployment for the university loaner program.

Ohio University Office of Information Technology | Athens, Ohio

October 2023 – March 2024

IT Service Desk Technician I

- Provided support for hardware, software, and network issues, ensuring high customer satisfaction.
- Diagnosed and resolved user-reported technical problems through critical thinking.
- Assisted students and faculty with password resets, account security, and software installations.
